# Project 2 – Overview

Our second project this semester will be the case "Moneyball for Murderball: Using Analytics to Construct Lineups in Wheelchair Rugby". Read the case and consider the following questions.

1. Assume the role of Ming. What is the problem you are trying to solve?

2. Up to this point, you have learned about several different OR tools that you can use to solve real-world problems. Which tools do you think you might use to solve this problem? Roughly speaking, how can you use these tools to solve this problem?

3. Open the data files that are attached to this assignment. What data is available? What does the data look like?
